Accelerate & Diversify Your Dermatology Program

With a robust database of prescreened participants across seven fully integrated sites, our team stands ready to meet your enrollment timelines and key study milestones.

>250,000 database of consented, prescreened participants

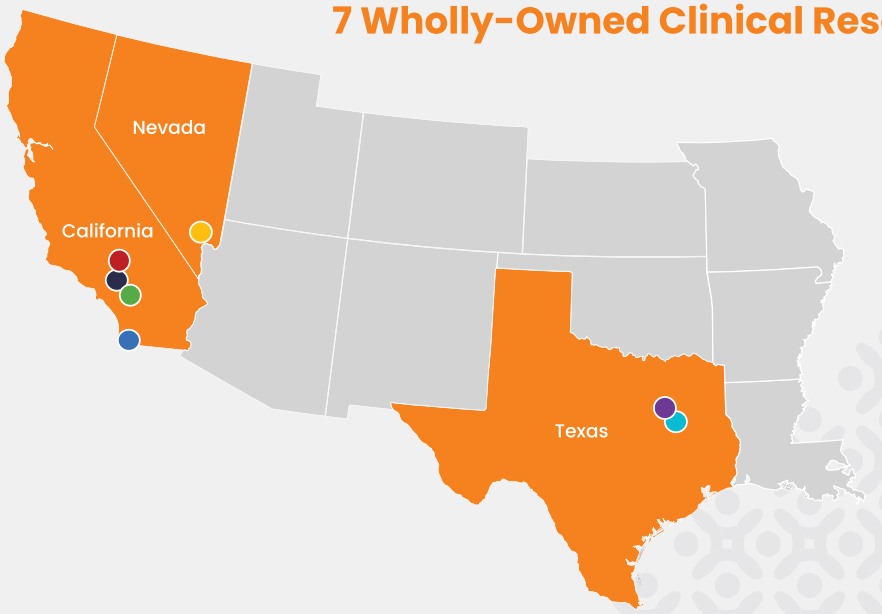
85% of database from underrepresented populations

>20% of database 65+

Proven Expertise Across a Broad Range of Dermatology Indications

Atopic Dermatitis	Rosacea	Alopecia Areata	Skin Barriers
Acne	Psoriatic Arthritis	Skin Hydration	Topicals

7 Wholly-Owned Clinical Research Sites



- **Alliance Clinical West Hills**
  West Hills, CA
- **Alliance Clinical Canoga Park**
  Canoga Park, CA
- **Alliance Clinical Los Angeles**
  Inglewood, CA
- **Alliance Clinical San Diego**
  San Diego, CA
- **Alliance Clinical Las Vegas**
  Las Vegas, NV
- **Alliance Clinical Lewisville**
  Lewisville, TX
- **Alliance Clinical Dallas**
  Dallas, TX

Three Keys to a Successful Dermatology Study

Rapid Study Startup. Audit-Ready Data. Diverse Participant Population.

Rapid Study Startup Enables Brisk Enrollment

We begin with a proprietary database of >250,000 prescreened participants. Harnessing technology, we then quickly identify and contact appropriate candidates across our sites, proactively scheduling them in anticipation of site activation. This accelerates time to FPI.

In a recent atopic dermatitis study, our sites rapidly achieved their study caps ahead of schedule - with screen failure rates well below the industry average.

Comprehensive Focus on Quality Produces Audit-Ready Data

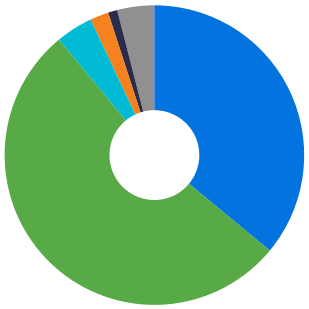
We use a streamlined visit management process that allows us to efficiently consent and treat participants with minimal downtime and maximum quality. We bolster that with:

- Overnight quality control on 100% of visits
- Automated eSource exception reporting
- Ongoing third-party internal audits

These tactics—implemented across all projects—enable us to catch and correct issues in near real time. The result: conclusive, audit-ready data for your clinical study.

Intentional Design Delivers Diverse Participant—and Staff—Population

Establishing purpose-built study sites in communities and cities with underrepresented residents, Alliance Clinical places a deliberate focus on helping ensure that innovative new therapies are effective across populations.



Breakdown by Race

- Caucasian: **36%**
- Black/AA: **53%**
- Asian: **4%**
- American Indian & Alaska Native: **2%**
- Native Hawaiian & Pacific Islander: **1%**
- Other: **4%**

Breakdown by Ethnicity

Hispanic/ Latino: **38%**	Not Hispanic/ Latino: **62%**

About Alliance Clinical Network

Alliance Clinical's fully integrated, wholly owned and operated clinical research sites help advance human health by delivering exceptional clinical trial data gathered from a proprietary database of >250,000 consented participants. Our centralized management harmonizes processes and systems to deliver consistent study execution across our seven sites—a solid foundation from which to meet your study needs.
